THIS IS UNEVALUATED INFORMATION

CLASSIFIED INFORMATION COPY

continuous and

thorough coverage of all military posts, troop training grounds including the railroad lines in their areas, and a careful analysis of railroad records made it possible to obtain the general OB in Eastern Germany 1952. It was definitely determined that no essential changes occurred in the distribution of units at troop training grounds of military posts. The strength of the units is believed to have increased only slightly as a result of the personnel movements which were rather small during the second half of July 1952. In July and August 1952, the personnel and materiel of the Volkspolizei cadre divisions were further reinforced. The area of Ruegen Island and northeastern Mecklenburg were the centers of activity. The units stationed there were appreciably augmented by personnel from other cadre units in Eastern Germany. Weapons from the U.S.S.R. were received by the units. Reports on the establishment of the Ministry for National Forces can be considered confirmed.

### Order of Battle.

1. Reports received during the period from 1 August to 1 September 1952 revealed no changes in the general OB in Eastern Germany.
2. The following units in Eastern Germany, [redacted] permanent locations and dates of observation were confirmed between 1 August and 1 September 1952: 25X1

Change of Quarters.

3. Since May 1952, there have been numerous reports indicating that Soviet-occupied installations were to be vacated for units of VP divisions which are being activated. Confirmatory observations have already been made in several towns, for instance in KAMENZ where, at the beginning of August 1952, the barracks installation was vacated by the rear unit of the 45th Gds Tank Regt of the 11th Gds Tank Div. Only a rear detail of about 30 men was left behind. The tank regiment which is at KOENIGSENBURG will possibly stay there or be transferred to MEISEN in the fall of 1952. The Artillery Kaserne in JENA-ZWARTZEN was also vacated by the rear unit of the 20th Gds Mecz Div in mid-August 1952, and the installation was turned over to the VP. In addition, large barracks installations were under construction near the Vogelsang railroad station and near KAMENBURG, both in the area of the TEMPLIN troop training grounds. It was alleged that their construction would extend over a long period of time. It is believed that they are being built to house components of the Fourth Gds Mecz Army which will vacate installations for VP divisions. It has not been determined whether quarters for the VP can be made available this fall, for instance in PRENZLAU or ORANIENBURG.

4. It is fairly definitely believed that <sup>during</sup> the fall of 1952, the 11th Gds AT Arty Brig of the Fourth Gds Mecz Army in DOEBERITZ-OLYMPISCHES DORF and the 2d Light Arty Brig (US) of the Second Gds Mecz Army in ORANIENBURG-NEICSE STADT will vacate their quarters and that the brigades will be in the pertinent army billeting area. The rear unit of the 11th Gds AT Arty Brig followed the brigade to the TEMPLIN troop training grounds in early August 1952. Coinciding with this movement, an advance party which   could belong to the 2d Light Arty Brig (US) arrived in Olympisches Dorf. In July 1952, large sums of money were allotted for the construction of new Soviet barracks installations in BERGEN on Ruegen Island and in the area of PRORA and for enlarging the Putlitz Kaserne and the Ulman Kaserne in ROSTOCK.

25X1

SECRET/

25X1

SECRET

4

25X1

The construction work is allegedly to be completed by September 1952. It is therefore expected that the 4th AT Arty Brig of the IV Arty Corps will remain on Ruegen and the unidentified Artillery Brigade of the LXXIX Itz Rifle Corps in ROSTOCK. Unconfirmed information tended to indicate that the headquarters and elements of the 596th Itz Rifle Regt of the 207th Itz Rifle Div, which were not committed to border guard duty, had moved from GANDELBOHN airfield to KLOETZE, northwest of GANDELBOHN.

5. In early August 1952, groups of houses in KILANKUHL/Oder, COTTBUS and ROSTOCK which had hitherto housed German civilians, were vacated on short notice to quarter German and/or Soviet offices which were set up when the previous governments in the Laender were reorganized into administrations of districts.

#### Training and Field Exercises.

##### 6. Division Training.

On the basis of all information received during the period under review, it can definitely be stated that the occupation of the troop training grounds has not changed since June 1952. This also is true of those troop training grounds whose coverage was made difficult by severe restrictive measures. Evaluation of troop training grounds where observation was possible showed that, in August 1952, troops were engaged in training at individual and group level but predominantly at battalion level. Training even extended to regimental level, and the surrounding areas of the troop training grounds were used in some instances. Divisions of the Second Gds Mezz Army, which did not move to troop training grounds as had been done in the preceding months, trained their units in areas near the military posts which had been specially prepared for this purpose for years and, simultaneously, sent artillery units to the area of JUTTESBOG to fire with live ammunition. In detail, the following information was obtained on quarters and troops at the training grounds:

**KINDL:** Prior to 16 August, the camp west of LIMA was still occupied to capacity by troops, presumably of the 57th Gds Itz Rifle Div; Camp KINDL was only lightly occupied, probably by headquarters units of the LXXIX Gds Itz Rifle Corps from MAULBURG and LIECHENBURG. AAA units which arrived in KINDL in late July and early August, had probably been at JUTTESBOG for practices. Major field exercises were not observed prior to mid-August on the training grounds or in its vicinity.

**CHERUF:** The two camps in the CHERUF-GRANINKEL area were still occupied by units of the XXVIII Gds Itz Rifle Corps in early August. Elements of this corps which had been transferred to the FINESTENWALDE area on 26 and 29 July, probably the corps headquarters and corps troops, returned to CHERUF on 9 August.

**LOSOA:** Stringent security measures made it <sup>im</sup>possible to obtain details on the occupation and activity at the training grounds. Information from HALLE fairly definitely indicated that the majority of the 21st Gds Mezz Div was at LOSOA in mid-August.

##### **LETTING**

**HEATH:** Reports received until mid-August indicated that the location of units in the LETTING HEATH area was as follows:

**Camp GHI:** 19th Mezz Div including the elements of this division permanently stationed in the two barrack installations in HILDESLAND which are believed to have moved to Camp BOLE in July; and army troops of the Third Shock Army including the 136th Gds Tank Bn sent from BURG.

SECRET/

5

25X1

Camp PLANKEN: 7th Gds Tank Div.

Camp BOLLE: 10th Gds Tank Div.

Camp JAEVENITZ: Major contingents of the 207th Itz Rifle Div from STENDAL and GATDELSHUN, including some by rotation.

Individual units of the 18th Mezz Div possibly were in LUTZLING HEATH for short term practices in early August. No further units were observed.

WITTSTOCK: The WITTSTOCK troop training grounds was occupied by elements of the 18th Mezz Div presumably at regimental level who conducted a several-day practice in the area west of WITTSTOCK, in mid-August. AAA units of the division were at MUGROW during the second half of July.

KOENIGS-  
BRUNCK:

The north section of the summer camp west of the SCHLAFNITZ-SCHNORKAU road quartered the 8th Gds Mezz Div. The south section quartered elements of the 11th Gds Tank Div which were not permanently stationed at KOENIGSBRUNCK. Units possibly including the 15th Gds Tank Regt of the 11th Gds Tank Div from KENIGS will allegedly remain at KOENIGSBRUNCK during the fall. In late July, engineer units which had presumably been engaged in practices on the Elbe River north of NIEBA arrived at the SCHLAFNITZ railroad station.

ZEITHAIN: No information confirming the 9th Tank Div which is assumed to be located at ZEITHAIN has been received during the period under review. As no elements of the division were observed at KOENIGSBRUNCK or the military posts, it is rather probable that the majority of the division is in the ZEITHAIN area.

OTTENLICH: As the training area was being used only by elements of the 8th Gds Mezz Div which remained in the division area, the area was again of only local importance in August.

JUSTERBOG  
area:

In mid-August, the BERDER-TAKENLOFF troop training grounds was still occupied to capacity by components of the 6th Gds Tank Div from WITTENBERG and JUSTERBOG-Altes Lager. According to [ ] the troops are scheduled to stay there until October. On 31 July, artillery units of the 1st Mezz Div and the 9th Gds Tank Div of the Second Gds Mezz Army started rotating to the JUSTERBOG troop training grounds for short-term firing practices. They were quartered in a tent camp 3 km west-southwest of the LUCKENWALLE railroad station. Elements of the 91st Gds PL Regt of the Third Gds Mezz Army from LUCKENWALLE may also have participated in exercises in this area in August. Information on the occupation of the barracks installations tended to indicate that, during the period under review, individual components of the 11th Gds Mezz Div from JUSTERBOG held several-day training circles in the vicinity of the city, presumably at the troop training grounds.

WEISSWASSER: The 9th Mezz Div was confirmed in Camp KOGITEN until about 13 August when field exercises up to regimental level extended toward GATDELSHUN. Artillery and AAA units of the division were in the area of JUSTERBOG for several days of firing practice in late July and early August.

SECRET/

25X1

SECRET

6

25X1

TEMPLIN: Until mid-August, no changes in the occupation of Camps VOGELSAAG and KANNENBURG were discernible. Elements of the 6th Gds Mecz Div and 25th Tank Div and headquarters units of the Fourth Gds Mecz Army were still quartered there. The training at battalion level and below was usually held at the training grounds north of the two camps and, as in the fall of 1951, in a large clearing north of GROSS SCHOENBUCK. The latter terrain was chiefly used as a tank firing site. In July, large barracks installations were under construction near the VOGELSAAG railroad station and near KANNENBURG. The entire area of KURTSCHELAG-BEBERSEE-VIETMANNSDORF, where several cantonments were being established, was surrounded by a fence. Large wooded areas were being deforested. As the prefabricated building sections assembled here allegedly came from Camps HALLERSPRING and VOGELSAAG, it is believed possible that the training area is to be shifted farther to the southeast and that the erection of barracks installations in the VOGELSAAG-KANNENBURG area is in conjunction with this.

LIEBROSE: The components of the 7th Gds Mecz Div have also started training at battalion level during the first half of August. In early August, elements of the 312th Gds ML Regt of the Fourth Gds Mecz Army from ZIEGLER were in the area of REITZ, south of JUELITZ for three-day practices. Components of the 288th Gds ML Regt practiced at the JUELITZBOG troop training grounds during the first half of August.

7. The three divisions subordinate to the Second Gds Mecz Army were still confirmed in their billeting areas until mid-August 1952. The units were trained in the vicinity of their posts. The 1st Mecz Div rotated their troops to the DOBERNITZ troop training grounds, and a tank unit of the division was holding a four-day practice in the area of NEUSTADTLITZ. During the first half of August, the majority of the regiments and battalions of the 12th Gds Tank Div was concentrated for large-scale continuous field exercises in the NEUSUPPIN-NEUMINSBURG area. Exercises of the 9th Gds Tank Div could not definitely be identified. However, it can be assumed that the areas between NEUSTADTLITZ and NEUBRANDENBURG and that between NEUSTADTLITZ and the Lucritz Lake were used for summer training. A cantonment at Domjoch Lake which has been occupied by tank and motorcycle units of the division since June is believed to be the starting point for long-term training cycles. During the period from 31 July to late August, artillery components of the three divisions moved to the JUELITZBOG troop training grounds for several-day firing practices.

#### Special Exercises.

##### C. Artillery.

In late July and early August, a transfer took place between the 113th(?) Gds Gun Arty Brig of the 34th Arty Div (US) hitherto in POLSDAM and the 30th Gds Gun Arty Brig of this division stationed in the northern section of the Delius Kaserne, which moved to ALT ZIEGLER in April. During the first half of August, ALT ZIEGLER was occupied by components of the IV Arty Corps and army artillery units of the Eighth Gds Army and Third Shock Army, which have been assembled there for more than three months, and AT artillery, rocket launcher and light tank units which practiced there by rotation. Identification of the units was limited as a result

It could only be determined that units practicing at ALT ZIEGLER included components of the Eighth Gds Army, the Third Shock Army, the Fourth Gds Mecz Army, and AT units and mortar units of the IV Arty Corps.

25X1

SECRET

25X1

25X1

9. AAA Units.

During the second half of July and early August, 20 shipments with AAA units arrived at the MUSTROW AAA Range and 24 shipments of AAA units departed from MUSTROW. From available information on dispatching and receiving stations of the shipments from and to MUSTROW, the following units were on the AAA range during the time under review: elements of all the nine AAA divisions in Eastern Germany; elements of the AAA regiments of the XXIX Gds Itz Rifle Corps and of the LXXIX Itz Rifle Corps; elements of 11th Gds Mecz Div, of the 18th Mecz Div, and, possibly, of the 207th Itz Rifle Div. Air force AAA units from the airfields of BRAND, FRIESTERWALDE and JERNBUCHEN moved to MUSTROW for firing practices in early August. Units with motor vehicles observed in the MUSTROW area in mid-August and, thus, confirmed there until that time included the 2d, 3d, 4th and 6th Gds AAA Divs, the 63d AAA Div (US), and 13th AAA Div and the 11th Gds Mecz Div. Daily AAA firing practice at sleeve targets towed by aircraft was observed until mid-August.

10. Engineer Troops.

In early August, it was observed that, similar to the mid-July practice of the Third Gds Mecz Army, a training cycle for engineer units was completed in the area of the Third Shock Army near BITTKAU and in the area of the First Gds Mecz Army on the Elbe River north of RIESA. An engineer component of the 9th Gds Itz Rifle Div departed from BITTKAU on 8 August, presumably to return to the division area to HAGENOW, and an engineer unit, possibly an element of the 19th Gds Mecz Div or an army engineer unit of the Third Shock Army, arrived at BITTKAU. The transfer of troops was made after a pontoon bridge had been constructed across the Elbe River near POLTE about 1 August. Vehicular traffic in convoys included vehicles of the 15th Mecz Div, the 19th Gds Mecz Div and other unidentified elements of the Third Shock Army. Engineer troops of the 7th Gds Tank Div who were seen constructing a bridge near POLTE on 21 and 22 August are believed to have come from BITTLING HUNT. Army engineer units of the First Gds Mecz Army, which departed from their quarters in DRESDEN-UNTERGARTEN in early March returned on 4 August. Engineer units who probably belonged to the 8th Gds Mecz Div and 11th Gds Tank Div were unloaded at KOTTIGSHUNCK beginning in late July. Checks on the Elbe River banks between TORGAU and RIESA revealed that the engineer units of the First Gds Mecz Army had presumably been quartered in a camp on the eastern bank near KRELLITZ, north of OTTESHA. This generally corresponds with previous information, according to which the engineer troops of the First Gds Mecz Army were carried in the MUEHLBERG area. In the DRESDEN area, the unidentified engineer regiment of the GOFG and the 36th Pon Bridge Regt of the GOFG were still confirmed in camps on Hirschloekerdamm north of the DRESDEN-ARNO road and on the Elbe River east of KOSLAU respectively until mid-August. According to vehicular traffic observed, it is possible, although not definitely confirmed, that elements of these regiments participated in the final phase of the command-post exercise in the FRIESTERWALDE-ITZMERLE area.

[redacted] during the first half of August, engineer units of the Eighth Gds Army were again in the DRESDEN-ARNO area; however, no details could be obtained [redacted]

[redacted] Training cycles of the engineer units of the Third Gds Mecz Army on the Elbe River in the BITTLING HUNT area which had been completed in mid-July had not been repeated in August. About 1,000 troops with numerous engineer equipment were in the KOTTIGSHUNCK area in late July and in early August. It is believed that engineer components of the Eighth Gds Army, chiefly elements of the XVIII Gds Itz Rifle Corps not employed in the DRESDEN-ARNO area, were stationed there

SECRET

25X1

25X1

for further training. Engineer units of the 1st Meck Div practiced presumably on Semlin Lake north of LITZENOW three weeks in August. Engineer units of the 12th Gds Tank Div, and other elements of the division, practiced in the area of the lakes north of LITZENOW during the first half of August.

# 11. Command Post Exercise in the FINSTERLINDE-LITZENOW Area.

Information obtained on the command post exercise in the FINSTERLINDE-LITZENOW area which had been mentioned in the report for July 1952 indicated that the exercise began about 12 July with the construction of a signal communication net within the FINSTERLINDE area. The net control which is believed to have been formed by headquarters elements of the GOC, was possibly located in a cantonment in the Duergerheide just west of FINSTERLINDE. During the period from 20 to 30 July, headquarters, signal units, AA and AT artillery units assembled and then took up positions for an attack across the Elbe River in the areas east of TOSBAU and northeast of LITZENOW. They were presumably divided in two separate combat groups. Having presumably practiced headquarters activity during the assembly phase for about one week with no discernible movement, the headquarters and units started moving toward the Elbe River in the evening of 5 August and crossed the river toward west, following a simulated attack group and probably crossing the river chiefly over permanent bridges. It could not definitely be determined to what extent engineer units of the GOC participated in ferry activity in the area of LITZENOW and, possibly, bridge construction in the area just east of LITZENOW. It is possible that elements of the army headquarters and headquarters units of the Fourth Gds Meck Army simulated a defense force against the units which crossed the Elbe River westward. These elements of the Fourth Gds Meck Army departed from LITZENOW on 26 and 27 July, allegedly for LITZENOW. However, no observations were made of the unloading of these elements at LITZENOW, and therefore it can be assumed that these shipments were redispached to the west. This hypothesis is supported by the intensive vehicular traffic on 6 August of unidentified units from LITZENOW toward KOTTBORN and by loadings on 8 and 10 August of the GOC units at the DESSAU, HALLE and ANCHUTZ railroad stations. It also seems probable that the advance of the enemy group toward DESSAU from the west resulted in movements of major motor vehicle convoys. These convoys were observed during the period from 4 to 7 August, and moved from the east via LITZENOW as far as the area west of DESSAU. The command-post exercise appeared to have been completed on 7 August. The signal center in the training area was deactivated and the signal equipment was dismantled on or after 14 August. According to [redacted] rail movements, especially according to troop trains carrying troops to their home stations from the area of TOSBAU, LITZENOW-KOTTBORN and the area of LITZENOW, the command post exercise involved headquarters elements and signal communications units of the GOC, elements of the IV Arty Corps with units of the three [redacted] divisions, and elements of all army and corps headquarters including subordinate headquarters units. The components of the Fourth Gds Meck Army possibly simulated an enemy force.

25X1

# 12. ROSTOCK Area.

In late July, the Putlitz Kaserne and Ulmer Kaserne in ROSTOCK were still occupied by artillery troops of the unidentified artillery brigade of the LITZENOW Rifle Corps which had arrived in early May 1952. It is notable that [redacted]

25X1

The reason

SECRET

25X1

25X1

25X1

[redacted] There is no indication at present that the occupation of the two barracks installations has been changed or the subordination of the brigade reorganized. The fact that money has been allocated for the enlargement of the barracks installations tends to indicate that the brigade has been assigned KOSTOK as its permanent post.

13. Ruegen Island. The 14th AT Arty Brig of the IV Arty Corps was positively confirmed in the eastern part of Ruegen Island [redacted] until only mid-July 1952. However, on the basis of transportation records, there is reason to believe that the brigade was still stationed there in August. The construction of permanent quarters tends to indicate that the brigade is going to stay on Ruegen Island during the winter. Shipments of AAA units, which were sporadically observed on the BTALSWED-ROCKEN railroad line in both directions during the period from mid-July to 25 August [redacted] belonged to elements of the IV Arty Corps, made it appear possible that AAA units are rotated to Ruegen for firing practice with live ammunition, similar to the practices held in MUSTROW. However, no confirmation could be obtained because of the strict security measures.

#### Personnel.

14. The exchange of personnel which started on 16 July 1952 with the arrival of troop trains from the east was almost completed by 27 July. However, there were four troop trains which, according to unconfirmed information, were dispatched to the east from MUSTROW on 10 and 11 August. The arrival of 15 trains with recruits was observed during the period from 16 to 27 July and 6 trains with discharges were observed leaving Eastern Germany between 19 and 21 July and on 10 and 11 August. Assuming that each train carried about 1,200 men, a total of about 21,000 men has arrived, and about 7,000 men have returned to the U.S.S.R. The short time involved in the exchange cannot yet be accounted for. An unconfirmed report from KOSTOK alleged that releases abruptly stopped in late July. It is also conceivable that, in July, only as many personnel were shipped in from the U.S.S.R. as were actually needed while major troop contingents may arrive in the fall bringing about further releases.

#### Evaluation of Motor Vehicle Numbers.

15. A new evaluation of [redacted] the IV Arty Corps and HQ units was completed.

#### Transportation.

16. The traffic situation of the East German Railroads was normal during the reported period. During the first third of the month, the number of railroad cars claimed by the Soviet occupation power was rather high, but later dropped to a normal level. In August, coal reserves showed a rising tendency for the first time. Coal stocks available on 13 August were adequate for 13.2 days' operations compared with 12.8 days' in the preceding month.
17. Traffic through border stations along the German-Polish line, though certainly at a slightly increased level, could still be considered normal. Special transportation operations included:

SECRET

10

25X1

- a. The motor vehicle exchange program in progress between the U.S.S.R. and Eastern Germany since mid-February 1952.
- b. The shipment of tanks and artillery pieces from the U.S.S.R. to Germany, particularly during the period from 10 through 14 August. The dispatch of heavy-duty flatcars to the east indicates that still more tanks will be moved to Germany.
- c. The exchange of personnel, which started in mid-July, was discontinued at the end of the month.

18. Major railroad construction projects included:

- a. The construction of the BERLIN-BREITENBURG line section of the Berdring BREITENBURG project. By utilizing night shifts, the railroad authorities hope they may be able to complete the work by the target date of 15 September 1952.
- b. Reconstruction of the dismantled second track on the GORUM-BREITENBURG railroad line. According to unconfirmed information, rails for this project were delivered by Great Britain.
- c. The reconstruction of the dismantled single track LITTOG-BREITENBURG railroad line on Ruegen Island was completed on 15 August 1952.
- d. Work on the reconstruction of the second dismantled track of the HOSCHEN-BREITENBURG railroad line section started on 5 August. This stretch was the last single track section of the otherwise double track BERLIN-BREITENBURG railroad line.
- e. A double tracking of the railroad bridge over the Oder river at BREITENBURG was in progress. The bridge over the flood area of this river near BREITENBURG was completed on 7 August.

19. In conjunction with a tightening up of security measures, all bridges, viaducts, tunnels were declared restricted zones. According to official calculations of the Railroad Tank Car Distribution Point, BERLIN, the following numbers of tank cars suitable for the shipment of white products were available in Eastern Germany in late July 1952:

Number of Railroad Tank Cars	Average Capacity (in hectoliters)
2,460	250
5	300
54	600
112	undetermined

Total  
2,631

Supply Situation.

20. The motor vehicle exchange program of the Soviet army continued through July and the first half of August. During the period from April to 20 August 1952, a total of approximately 6,000 motor vehicles entered Germany. During the first half of August, approximately 200 tanks and about 1,100 artillery pieces and mortars including 123 howitzers were observed entering Germany during the period from April through 20 August.

ILLEGIB

SECRET

II

25X1

From other observations, it appears that the bulk of this equipment was furnished to VP divisions, which were being activated. This special operation considerably increased the monthly normal average of supply shipments from approximately 1,000 freight cars to 2,529 in July. Of these, 1,000 cars were loaded with new motor vehicles. Supply traffic from the U.S.S.R. in the first half of August presented the same picture; 735 cars loaded with new vehicles and 195 flatcars loaded with artillery pieces arrived in Germany.

#### German Volkspolizei.

#### 21. Ministry for National Forces.

On 15 May, a cover headquarters which had the unofficial designation Ministry for National Forces was formed within the Ministry of the Interior. Chief of the Personnel Section is Minister of the Interior Willi Stoph. His deputy and PK Leiter is General Inspecteur der VP Rudolf Loelling who was detached from the NVA. It is planned to place the High Command of Army, Navy and Air Force under the jurisdiction of the future Ministry for National Forces. The ministry will further include an undetermined number of Hauptverwaltungen, e.g. for Politkultur, organization, military schools, transportation etc. About 150 persons are employed with the ministry at present. The budget provides for about 7 million eastmarks for the period from 1 July to 31 December 1952. About 200,000 eastmarks of this amount were spent in June and July 1952, chiefly in personnel overhead.

#### 22. Redesignations.

On 1 July, the NVA was redesignated the Ministerium des Inneren - Hauptverwaltung fuer Kasernierte Volkspolizei (HVKVP), and the VPDs were renamed Kasernierte Volkspolizei Dienststelle (KVPD).

#### 23. Main Point of Activation.

A corps or army of Kasernierte VP (KVP) is being activated in the PLOUA-BARNESIN-PRECHLAU-PILICOW areas and has its headquarters in PRECHLAU. This corps or army includes the divisions of KVPDs in PLOUA, BARNESIN, PRECHLAU and PILICOW. The ASA officer school in PILICOW was transferred to PLOUA. A new cadre division, i.e. a KVPD, is being activated in PILICOW.

##### a. Personnel.

Since late July, about 20,000 men had been detached from all KVPDs for duty in the PLOUA, BARNESIN, PRECHLAU, PILICOW areas. The corps may now have a strength of about 32,000 men.

##### b. Armament.

In August 1952, the above mentioned area received about 400 guns of various calibers from the Soviet central depot at FUERSTENBERG. The activation of corps or army artillery can be expected as these artillery pieces also included 85-mm AA guns and 152-mm howitzers. It can also be assumed that a corps or army engineer unit will be activated from personnel of the KVPD FUERSTENBERG near FUERSTENBERG. It is obvious that in order to speed up the activation of full divisions, the existing KVPD corps or army are being provided with replacement personnel and equipment. The transfer of equipment from some of the divisions, which received replacement personnel, to their original cadre strength of 1,500 to 2,000 men, and the KVPDs received no new weapons during the period under review. Components of guns were

SECRET

SECRET

12

25X1

observed arriving only at ILUON where a central ordnance depot of the WKVP is assumed to be located in addition to an ordnance school, ordnance shop and ordnance testing shop. None of these units have yet been observed being distributed to the individual KVAs.

#### 24. Military Construction Projects.

The Bauunion PCTOLAN is in charge of the construction of barracks installations costing 11,000,000 eastmarks, including 4,000,000 eastmarks allotted for barracks installations of the KVPD in PRCHA. The Bauunion Nordost in PRCHLAU is in charge of the construction of barracks installations in the PRCHLAU-BOGELIN-TORGELO area at a cost of 20,000,000 eastmarks. All these installations are probably destined for the units newly activated in PRCHA, BOGESIN, PRCHLAU, PIENOW area.

#### 25. Summary.

While all cadre divisions had received relatively equal allotments of personnel and arms, it was observed that, in late July, the activation of units in the BOGELIN-PRCHLAU-PIENOW area were given priority in an effort to first speed the build up of some of the units to full T, O and N strength. It can be expected that the other KVPDs will be augmented upon completion of the activation of the corps or army. However, the authorized strengths can only be reached if compulsory service is introduced. \*

#### AUGUSTA-MUNSTER.

#### 26. Order of Battle.

The following units were confirmed

25X1

Unidentified signal regiment of the Central Group, in ST. POELTEN until 25 June;

25X1

14th Gds Recz Regt, in VIENNA until 26 June;

15th Gds Recz Regt, in TRICKENBERG until 31 May;

16th Gds Recz Regt, in KLOSTERNEUBURG until 1 May;

15th Tank Regt, in BRUCK on the Leitha River until 2 March;

106th Gds Hvy Tank GP Regt, in KATZEL until June;

106th AAA Regt, in KACHENBURG until 12 June;

1336th AAA Regt, in KACHENBURG until 10 May;

23d AAA Div Hq, in GROSSMUNSTER until 5 June.

Reports indicated that the 37th Gds Hvy Tank GP Regt of the 2d Gds Recz Div, carried in GAGLE, was not at the post but presumably at a troop training grounds on 31 July 1952.

25X1

SECRET

25X1

27. Training.

Elements of the 13th Gds Mecz Div including the 15th Gds Mecz Regt have been absent from their posts since late July. Components of the 95th Gds Rifle Div in ST. POBLETEN were absent from their posts since early August. It can be assumed that the units are at the DOBLESZKIN troop training grounds for combined arms training.

U.S.S.R.

28. [redacted] in World War II, [redacted] the 336th Gds Rifle Regt of the 120th Gds Rifle Div, was seen on a Soviet document dated 13 December 1951 from MINSK. At the end of the war, the division was identified under the command of the XXXI Rifle Corps of the Third Army in East Prussia. The Third Army had been activated in the area of MINSK by the 1D West in 1941. A review in 1949 by Major General Urbanovich (fnu) who had been commanding general of the XXXI Rifle Corps in 1941 had at the time been considered an indication that the units of the Third Army were retransferred to the area of MINSK after the war. The information on [redacted] a regiment of the 120th Gds Rifle Div in MINSK supports this assumption.

25X1

25X1

- \* [redacted] Comment. For Soviet Order of Battle in Germany as of late August 1952, see Annex 1. For location of the individual divisions and the independent units in Eastern Germany and the exact dates of confirmation, see Annex 2. [redacted]

Present Location of Divisions and Independent Units  
in Eastern Germany

Last date of confirmation in parenthesis. The dates may differ slightly with those in the body of the report, as the Annex was being worked on until 4 September.

<u>Group or Army</u>	<u>Unit</u>	<u>Location</u>
GOPG	6th Arty Div	The bulk at ALTENGRABOW (21 August).
	34th Arty Div (US)	Two brigades at ALTENGRABOW (21 August); 1 brigade in POTSDAM (19 August); transfer of 2 brigades from POTSDAM during the period from 31 July to 7 August.
	4th AT Arty Brig	On Ruegen Island, eastern part (August).
	2d Gds AAA Div	Elements at WUSTROW (14 August); elements presumably at ALTENGRABOW since 2 August.
	6th Gds AAA Div (US)	Elements at WUSTROW (14 August); elements presumably at ALTENGRABOW until 30 July.
	32d AAA Div (US)	Elements at WUSTROW (until 2 August); elements in the JUELTLRBOG area (until 30 July).
	U/1 AAA units of the IV Arty Corps	On Ruegen Island in July and August.
	U/1 Engr Regt	Area of ALTEN-DESSAU (15 August).
	36th Pon Bridge Regt	In the area east of ROSSLAU (12 August).
Eighth Gds Army	13th AAA Div	Only guard details at the post (11 August); elements at WUSTROW (14 August); other elements probably in OHRDNUF KINDEL and LOSSA; detachments at ALTENGRABOW (21 August).
	43d Gds Army Arty Brig	The bulk at ALTENGRABOW (21 August).
	38th (?) Army AT Arty Brig	At post (early August).
	220th Hvy Tank SP Regt	Elements presumably at ALTENGRABOW (until 1 August); presumably rotated from post to training area until 29 August.
